DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Cross-references to related applications should be included as the first sentence of the specification. Further, the status of such applications should also be included.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 80 and 81 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 80 recites the limitation "said adjacent faces" in line 1. There is insufficient antecedent basis for this limitation in the claim. It appears that claim 80 does not depend from claim 1.
5. Claim 81 recites the limitation "said adjacent faces" in line 1. There is insufficient antecedent basis for this limitation in the claim. It is unclear to which claim 81 depends.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 5, 23, 36, 72, 74, 75, 76, 77, 82, 83, 84, 85, 86, and 87 are rejected under 35 U.S.C. 102(b) as being anticipated by Jansson #5,564,865. Jansson discloses a base 14; a header stack, wherein the header stack is comprised of a plurality of header units 12 that are mechanically interlocked; and an active reinforcement element 80 configured to cooperate with the stack so that post-tensioning the element imparts a corresponding pre-stressing force. The base 14 (see figures 3 and 4) appears to have a lip/flange that would provide a degree of mechanical interlocking between the header unit and the base. A like header unit 12 (or structural member) may be used to couple two header stacks.

Allowable Subject Matter

8. Claims 3, 4, 6-22, 24-35, 37-70, 78, and 79 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments with respect to claims 1-87 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
